## MODELS 2008

Hobby 690 SMF VIP Collection

The Hobby UK Special offers the highest comfort in the History of Hobby Caravanning. Absolutely fully equipped with highest standards of design and quality down to the smallest detail. Move in and enjoy the atmosphere of the latest interior decor and design. The Hobby 570 SMF, 640 SMF and 690 SMF VIP Collection exemplifies how wonderful life on the road with luxury furnishings can be.

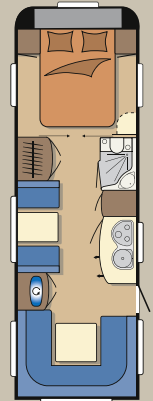

### Excellent

#### 570 SMF

#### 640 SMF

### Prestige

#### 690 SMF

The roofs and walls are 31 mm thick on all models, and floor thickness 40 mm. Due to the use of natural materials deviations of up to 5% are possible in weight data. All dimensions are non-binding and may be subject to minor changes. We reserve the right to effect modifications to technology and fittings.

<sup>1</sup> Depending on the model and fittings status, the unladen vehicle may be up to 50 mm higher.

<sup>2</sup> The technically permissible gross weight (earlier permissible gross weight) must not be exceeded under any circumstances.

<sup>3</sup> The weight in the ready-to-drive state includes the unladen weight of the standard caravan plus basic fittings. The basic fittings include two completely filled 11 kg aluminium gas cylinders, the fresh water tank filled to 100 % and a cable drum.

The basic fittings weigh, for the model:

400 - 500: 59 kg

520 - 750: 87 kg

<sup>4</sup> The loading corresponds to the difference between the "technically permissible gross weight" and the "ready-to-travel state". This value must take account of the values for special accessories and personal items.

### Technical data and floor plans

Overall length incl. drawbar	cm		
Body length, with/without cylinder box	cm
